

Air-Channel Star (ACH)

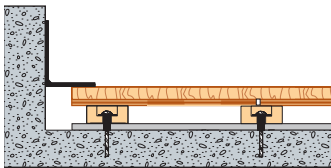

FEATURES:

- 25/32" or 33/32" MFMA Finger-Jointed Maple
- Continuous Subfloor Panel
- Patented Factory Prepared Wide Body Sleeper
- EPDM Rubber Bio-Pads
- Anti-Squeak Sleeve
- Anchor Spikes

ATTRIBUTES/BENEFITS:

- Technologically enhanced, stronger, longer, & straighter than random length maple
- Provides uniformity & heavy rolling load capability
- Assures uniformity and quality control designed to accept anti-squeak sleeve for correct depth anchorage
- Provides uniform support, resilience & under system airflow
- Provides proper anchoring
- Secures system channel and resists loosening over time from vibrations

ACH EQ₁

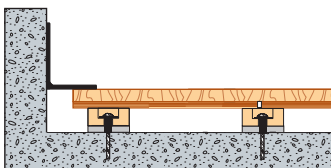

FEATURES:

- 25/32" or 33/32" MFMA Random Length Maple
- Continuous Subfloor Panel
- Patented Factory Prepared Sleepers
- Variable Stage Continuous Padding (made from 100% recycled compound)
- Anti-Squeak Sleeve
- Anchor Spikes

ATTRIBUTES/BENEFITS:

- Provides an aesthetically pleasing wear surface
- Provides uniformity & heavy rolling load capability
- Provides uniformity & quality control designed to accept anti-squeak sleeve for correct depth anchorage
- Provides uniform support, resilience & under system airflow
- Provides proper anchoring
- Secures system channel and resists loosening over time from vibrations

ACH EQ₂

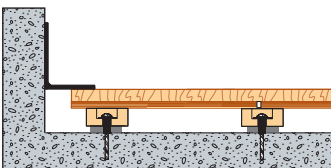

FEATURES:

- 25/32" or 33/32" MFMA Random Length Maple
- Continuous Subfloor Panel
- Patented Factory Prepared Sleepers
- Variable Stage Spaced Lineal Padding (made from 100% recycled compound)
- Anti-Squeak Sleeve
- Anchor Spikes

ATTRIBUTES/BENEFITS:

- Provides an aesthetically pleasing wear surface
- Provides uniformity & heavy rolling load capability
- Provides uniformity & quality control designed to accept anti-squeak sleeve for correct depth anchorage
- Provides uniform support, resilience & under system airflow
- Provides proper anchoring
- Secures system channel and resists loosening over time from vibrations

ACH EQ₃

FEATURES:

- 25/32" or 33/32" MFMA Random Length Maple
- Continuous Subfloor Panel
- Patented Factory Prepared Sleepers
- Variable Stage Spaced Individual Pads (made from recycled compound)
- Anti-Squeak Sleeve
- Anchor Spikes

ATTRIBUTES/BENEFITS:

- Provides an aesthetically pleasing wear surface
- Provides uniformity & heavy rolling load capability
- Provides uniformity & quality control designed to accept anti-squeak sleeve for correct depth anchorage
- Provides under system airflow & resilience
- Provides proper anchoring
- Secures system channel and resists loosening over time from vibrations
